

FLAMELESS

SMARTSCENTS BY PARTYLITE™ DECORATIVE FRAGRANCE STICKS

No liquid oil! No flame! Rolled paper fragrance sticks crafted of wood from a responsibly managed forest. SmartScents provide round-the-clock scent in any room with no liquid oil and no flames.

- Start with one stick and add more for increased fragrance. The fragrance is strongest for the first two weeks. To refresh simply add another stick.
- Each stick is now scored to divide easily into four – allowing for more versatility and options!
- Always use SmartScents with PartyLite SmartScents Holders.
- SmartScents Sticks are infused with highly concentrated fragrance oils. Please avoid contact between Sticks and fabric or finished surfaces. Wash hands after handling Sticks.
- To preserve fragrance, store unused Sticks in their re-sealable bag.
- Keep Smartscents Sticks out of reach of children and pets.

TIP

For best results,
use in small to medium
sized rooms

FRESH HOME SMARTSCENTS STICKS WITH NEOFRESH® TECHNOLOGY

are perfect when you want welcoming fragrance and odour neutralisation around the clock!

FRESH HOME BY PARTYLITE™ LINEN AND ROOM SPRAYS

Fresh Home Linen & Room Spray offers instant fragrance plus odour-neutralisation.

For fine or delicate fabrics, always test a small area first. Avoid contact with eyes. Always keep your sprays upright. Safe to use in areas with pets

CARING FOR YOUR CANDLE

THE BASICS:

- Position candles at least 5 cm apart, if burning more than one at the same time.
- If a 'wick blossom', develops on the wick, extinguish the candle, remove the 'blossom' and then relight the candle.
- Ensure that no foreign objects such as dead matches or remnants of trimmed wicks get into the liquefied wax. Foreign objects tend to become additional 'wicks' and this may result in uneven burning of the candle.
- Place candles on a flat and level surfaces. Avoid placing in direct sunlight and on hot surfaces such as windowsills, terraces, tiled stoves, televisions and computers.
- Trim wicks to about ½ cm each time before lighting, to avoid them bending to the side (with the exception of tealights and votives).
- For all candles, please take care to position the wick so that it points towards the centre.
- If the wick is too short and is in danger of 'drowning', extinguish the candle and use a tissue to remove some of the wax surrounding the wick.
- With tealights and votives, depending on the fragrance/colour and surrounding temperature, a wax residue may remain.

- For best results use a snuffer to extinguish the candle flame.
- Do not remove the sticker at the base of the pillar, as this may result in pulling out the wick.
- The warmer the surrounding temperature, the more easily candle wax liquefies.

RULES OF SAFETY:

- Never leave burning candles unattended and we recommend only burning them in PartyLite holders and on appropriate heat resistant surfaces. Take care when children or pets are nearby. Make sure to maintain sufficient distance to flammable materials.
- Do not place candles on or anywhere near furniture or electrical devices that are not heat-resistant.
- A burning candle should never be moved. Liquid wax can cause injuries or damage to surfaces.
- Avoid drafts or extreme differences in room temperature.
- Please pay attention to the advice on packaging and on product information inserts.

QUALITY:

- We search the globe for the highest quality sources for our fragrances, using the finest fragrance oils and manufactured ingredients.
- All fragrances comply with worldwide safety standards established by the International Fragrance Association.
- All PartyLite candles feature our proprietary wax formula, a custom blend of high-quality wax and food-grade paraffin that is specially crafted to deliver the very best fragrance experience and performance.
- PartyLite selects from over 100 wick designs to find the perfect match for every candle!
- Produced in the USA. Our candles are meticulously made in America using premium ingredients from around the world. PartyLite candles are stringently tested for exceptional performance and quality and are backed with a 100% Satisfaction Guarantee. Enjoy!

PARTYLITE®

CANDLES AND FLAMELESS FRAGRANCE CARE

January - July 2017

TIPS AND TRICKS
for the right care!

WAX

We create the world's best quality candles with 100 years of know-how behind us. Safe, clean-burning and long-lasting, our candles fill your home with appealing fragrance and inviting candlelight.

TEALIGHTS

Universal Tealight™ candles liquefy while burning and may be burned until the wax is completely consumed.

Available in over 30 fragrances, our tealights not only offer a great fragrance experience but multiple points of candlelight. Tealights should also be burnt in the appropriate PartyLite holder.

Burn time: 4-6 hours per tealight.

SCENT PLUS™ MELTS

Melts liquefy when placed in the dish of a PartyLite Warmer. In Electric ScentGlow™ Warmers use 3 Scent Plus Melts. In a tealight Fragrance Warmer use 4 Scent Plus Melts.

Melts offer a high fragrance lift and deliver up to 60 hours of fragrance.

VOTIVES

Votive candles liquefy while burning and may be burned until the wax is completely consumed. Votive candles leave behind a small metal disc once consumed. Please remove this from the holder before adding a new candle.

Always burn votives in appropriate PartyLite holders.

Burn time: 8 - 11 hours per votive

OUR PROMISE

All wax formulas are compliant with worldwide regulatory and safety standards. Our fragrances meet the standards established by the International Fragrance Association. Because we want you to be 100% candle happy!

GLOLITE BY PARTYLITE™

THE WORLD'S BRIGHTEST CANDLE™

Our unique GloLite candle will light up any room with an instant all-over shimmer just perfect for any season. Let it glow!

GLOLITE PILLARS

Each time you light your GloLite Pillar, allow it to burn long enough for the wax to liquefy to the candle rim.

As soon as the rim of the candle becomes soft, it expands to a balloon-like shape, giving the candle a natural look. If you'd like to have the GloLite back to its original straight shape, gently press the softened wax edge inward after the candle has been extinguished.

A GloLite Pillar must not be burned for longer than 3 hours at a time. Extinguish GloLite Pillars when they have burnt down to about 1.5 cm.

GLOLITE JAR CANDLE

Before lighting each time, trim the wicks of your GloLite jar to 1 cm.

After extinguishing, the wax surface might take a darker colour which will not influence the glow or the burn time.

Extinguish your GloLite jar when 1.3 cm of wax remains in the glass.

THE BEST WICKS

100%

cotton, lead-free wicks provide a clean and even burn. A specific wick is chosen for each candle form to ensure the best wax consumption.

PASSION IS BUILT INTO EVERYTHING WE TOUCH!

JARS

Jar Candles are highly scented to deliver an intense fragrance lift. Let them burn long enough for the wax to liquefy up to the edges. Use our Jar Candles on their own or make them part of your decorating scheme.

PARTYLITE 3-WICK JARS CANDLE

PartyLite 3-Wick Jars are truly unique! Available in 20 amazing fragrances specially formulated to be combined together. For the best fragrance experience, allow the candle to burn until the liquid wax reaches the edges of the glass. Use the embossed metal lid to extinguish the flames and keep the candle free of dust between uses.

FRESH HOME BY PARTYLITE™ SCENTED JAR CANDLE

Fresh Home candles use odour-neutralising technology to naturally eliminate unpleasant aromas. When burning multiple candles, be sure to place them 5 cm apart.

ESSENTIAL JAR SCENTED CANDLE

The Essential Jar features exclusive base shapes that visually signal the end of the candle.

Do not light the candle when only a small wax residue remains. Extinguish the candle when it has burned down to about 1.3 cm from the bottom of the jar.
